25X1 [redacted] Comments. 25X1

(1) For meaning of index figures before the slash of [redacted]

(2) Standard-gauge wheel sets, which were used by new railroad cars delivered to the U.S.S.R. These wheel sets will be returned fro the Soviet rail transfer points 25X1

(3) Refrigerator cars shuttling between the Soviet Zone of Germany and the U.S.S.R. for the importation of butter, lard etc. These return grain shuttle trains [redacted]

25X1 [redacted] A total of 105 loaded refrigerator cars entered the Soviet Zone in
25X1 March 1952. [redacted]

(4) Grain shuttle trains operating between the Soviet Zone of Germany and the U.S.S.R. See 25X1 [redacted]

(5) Deliveries to the Foundry Gorbing [illegible] near Frankfurt/Oder, those receiving station is Hilterdorf, and the Hermette Foundry at Unterwellenborn.

(6) Deliveries by Soviet Zone hydrogenation plants to the U.S.S.R. and returning empty railroad tank cars.

(7) These deliveries may have been dispatched to the uranium ore mining district in the eastern Harz Mts.

(8) It cannot be determined whether the consignee of this shipment was the air force depot, 25X1 [redacted] or the gun repair shop in Strausberg. [illegible] is located in Jessen.

(9) Uranium ore deliveries to the [redacted] ILLEGIB

(10) These standard-wheel sets were probably to be used by the new series of Soviet freight-cars expected to be returned by the Soviets to the Soviet Zone of Germany.

However, there is a remote possibility that the wheel sets were dispatched to a Soviet rail transfer point for use by loaded railroad tank cars to be forwarded to Germany.

(11) These motor vehicles were replacements for worn out equipment returned to the U.S.S.R. This motor vehicle replacement program has been underway since mid-February 1952.
